INTERNATIONAL, LLC
Worldwide Distributors of Plastic Resin

EU-REACH: Registration, Evaluation, Authorisation of Chemicals

Dear Valued Customer:

REACH is a European Union (EU) regulation on chemicals and the safe use of products (EC 1907/2006). It deals with the **R**egistration, **E**valuation, **A**uthorisation and restriction of **C**hemicals. The European Union (EU) law became effective on June 1, 2007

As a company committed to superior product stewardship, Marco Polo International, LLC. complies with the current requirements of REACH. Since Marco Polo International does not manufacture in the EU, our "Only Representative" (OR) fulfills this responsibility. Marco Polo International has registered the ethylene-monomer associated with its production of polyethylene polymer at European Chemical Agency using an Only Representative.

Substances of Very High Concern (SVHC):

Regarding Article 33.1 of the REACH regulation states that "any producer or importer to notify the European Chemical Agency when an article contains Substances of Very High Concern (SVHC) in a concentration above 0.1% weight by weight"

Polyethylene is not formulated with any of the Substances of Very High Concern (SVHC) as per the candidate list. This list is updated twice per year as ECHA updates the Candidate List. Current information can be found at the ECHA website. <https://echa.europa.eu/candidate-list-table>.

Marco Polo International continues to work with customers to communicate important information related to REACH and its requirements.

If you have any questions regarding REACH or Only Representative, please contact your Sales Representative.

Sincerely,
